Serial No. 10/622,598

## Amendments to the Specification

[0022] The operation of apparatus 300 will now be discussed in further detail. In one embodiment of the invention, input/output device 304 includes an input touch screen display as found in the QUALCOMM.RTM. pdQ.TM. smartphone, which is now manufactured and sold by Kyocera Wireless Corporation. Background for the pdQ.TM. may be found at <a href="http://www.kyocera-wireless.com/pdq/index.html">http://www.kyocera-wireless.com/pdq/index.html</a>, as of the date of this filing, and is hereby incorporated by reference. Input output 304 also optionally includes a standard touchpad and/or microphone speaker combination for audio input/output. A user selectively inputs alphanumeric characters into wireless apparatus 300 via a user keypad. Such a keypad is similar in nature to the keypad found on a conventional telephone where the alphabet is mapped to a set of numeric keys. For example, A, B and C are mapped to the number 2 on the conventional keypad. D, E and F are mapped to the number 3, and so forth. A string of alphanumeric characters is entered via the keypad or external keyboard. In an embodiment of the invention, any input beyond 32 characters is truncated, such as when a telephone number is to be dialed.
